

Solve by using the Quadratic Formula: For each question ensure all work is clear and visible and proper solution notation is given.

1. $5(x-1)(x+1) = 3x-4$

2. $3x^2 - 9 = 0$

3. $4x^2 - 12x + 5 = 0$

4. $3x^2 + 5x - 28 = 0$

5. $x^2 + 2x + 2 = 0$
